

GRESSO

A Stylish Sequel to Gresso Grand Monaco Collection

As an integral part of new Grand Monaco Collection, Gresso is pleased to introduce a line of USB Flash Drives.

Grand Monaco Collection is a concept different from all preceding devices created by Gresso. Conceptually new innovating design and high-tech materials borrowed from legendary supercars – all these features render the style of the best ultra-rapid automobiles in the world.

Grand Monaco flash drives are executed of hard and light titanium superalloy, a special development for Gresso. At the closing stage the case is coated with high-tech ceramic.

Another element taken from the world of Formula 1 is the carbon inserts. Formula 1 engineers consider carbon to be the best material ever used for a racing car body.

Grand Monaco Collection includes two models of USB Flash Drives: Double Security and Classic.

Design of Double Security USB allows to comprise two independent data sources – two flash drives with 64 GB memory total. Price – 300\$

At Gresso official website you may also order model Classic 8Gb/16Gb for 150 USD and 200 USD respectively.

Gresso is on Facebook

Particular information on Gresso Company and its new collection Grand Monaco is available at popular social network service Facebook. [Gresso page at Facebook](#) gives you a good choice opportunity to talk with representatives of the company, discuss the most interesting points and take part in development of Gresso new high-tech gadgets.
