

GRESSO

The White Diamonds Collection. A True Masterpiece by Gresso.

Gresso is proud to introduce its most magnificent collection - The White Diamonds.

A splendid blend of african blackwood and white diamonds encased with 18K gold is the distinguishing feature of the new collection.

The phone case is made of 200-year-old African Blackwood. Two identical Gresso phones do not exist, as well as in the nature there are no two identical trees. An exclusive feature is the design of the keyboard. Function keys are executed of gold and paved with magnificent white diamonds, each of 0,11 K.

The screen is protected by sapphire crystal glass of 42K. Moreover, the keyboard has special titanic covering that has been developed and patented by Gresso. The battery cover is executed of stainless steel and decorated with leather.

The White Diamonds Collection will be available in two models – **White Diamonds** and **Royal White Diamonds**.

Royal White Diamonds. An Exceptional Limited Edition.

23 function keys are executed of gold and encrusted with magnificent white diamonds totalling 2,53K. The front panel is embellished by a triangle inset of gold. The battery cover is decorated with the Gresso logo made of gold.

The edition of the Royal White Diamonds will be limited to 200 pieces only. The price of each piece is 33 000 euro.

White Diamonds.

Navigation keys are executed of gold and encrusted with 4 white diamonds totalling 0,44K. Every function key is made of gold using ultra-precision turning technology. This technology ensures a superlative degree of precision for each detail. The front panel is embellished by a triangle inset of gold. The back panel is decorated with the Gresso logo executed of gold.

The price - 9000 euro.

The collection will be presented at JCK Las Vegas Show, the leading jewellery fair in the USA, that will take place from May 30 to June 3, 2008.

Royal White Diamonds

GRESSO

Design and Materials:

- Avantgarde White Diamonds Collection is made of African Blackwood, which age is more than 200 years. Function keys are executed of gold and encrusted with white diamonds, each of 0,11K. The case of Gresso Avantgarde is hand-assembled.
- The battery cover is executed of stainless steel and decorated with leather.
- Another technical feat of accomplishment is the magnetic lock of the battery cover. This constitutes a double advantage, at once both an improvement in the reliability of fastening and in its ease of use.

Display:

- Sapphire crystal glass of 42 K frames the screen.
- TFT display, 65K colors, 240*320 pixels

Keyboard:

- Special titanic covering of the keyboard. Figures and letters are cut out by the laser.
- A special feature is the keyboard with Roman numerals. This is also an innovation by Gresso. No phone had ever been designed this way.

General Features:**Tri-band operation:**

- GSM 900/1800/1900

Sizes:

- Dimensions: 119,5*48*14 mm

Operating System:

- Windows Mobile 6 Standard

Memory:

- Internal memory: 64 Mb
- External memory: 2 Gb
