

GRESSO

Gresso Grand Monaco The World of High Speed Technologies

Gresso is pleased to announce its new line of exclusive mobile phones - Grand Monaco LE

Grand Monaco LE is a classic version of the collection. A peculiarity of the new series is the back panel decorated with genuine Italian leather.

In creating Grand Monaco LE line GRESSO employed high-grade automobile leather which is notable for the mode of production. Among other stages of processing there is impregnation which is supposed to make the leather damp-proof and provide protection from extreme temperature changes. Such leather is several times as much durable as ordinary one. The same very leather is used in decoration of luxury cars.

In all other respects the series remains intact and resembles the style of famous Formula 1 race cars.

The case is executed of superhard and ultralight titanium coated with several layers of high-tech ceramic. A hand-polished 42K sapphire crystal enframes the display.

Absolutely flat keyboard of Grand Monaco is made out of a single sheet of polished steel with ultrastrong titanium Black PVD, which makes the surface black mirrorlike and scratchproof. Figures and letters are laser cut. The navigation keys are made of stainless steel with the application of ultra-precision turning technology that ensures the superexcellent precision and impeccable shape of each detail. Magnetic Smart Lock for battery cover fastening.

GRESSO

The device holds all functions necessary for a businessman. 2-megapixel camera, Wap/GPRS/Bluetooth/SMS/MMS/e-mail/EDGE, Java. An outstanding menu design, interpreting the spirit and audacious style of the collection, was exclusively developed for Grand Monaco.

Two available designs: bright-red and black leather.

Grand Monaco LE will be available in dealer showrooms from September 29, 2009.
